

QUALITY POLICY

TWE is committed to providing quality services in the Fabrication of Pipe and Steel Structures and Labour Supply Services of Professional Welding Trades persons to customers across a wide range of commercial, industrial, institutional and government projects.

TWE management team are committed to continually promote improvement and effectiveness of their QMS, through communication, consultation, monitoring, measuring, evaluating the effectiveness of QMS and reporting at Annual Management Review meeting, to ensure the QMS remains suitable to our Business objectives and the safety of our Workforce.

Our approach to customers is one of developing good relationships and meeting customer requirements and expectations. Our commitment in actively pursuing the delivery of quality reliability, safety and professional services and products to the customer's needs is reflected in the support of our workforce and our suppliers of products, services and materials.

To ensure these objectives are met, Management are committed to ensure that Steel fabrication and welding of specialised high pressure vessels and pipes is conducted and maintained in accordance with the relevant ISO/AS/NZS Standards, customer requirements or the American Society of Mechanical Engineers (ASME).
